***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: claims 1-20 are allowable over the art of record. This is because the art of record does not disclose or teach the invention as recited in claims 1,13 and 18, and including the steps of receiving a first failing region, the first failing region corresponding to one or more circuits on the integrated circuit;

Generating a set of adaptive algorithmic test patterns for the one or more circuits in response to the first failing region and to a logic model of the integrated circuit;

Determining expected results for the test patterns;

Applying the test patterns to the first failing region on the integrated circuit resulting in actual results for the test patterns;

Comparing the expected results to the actual results;

Transmitting mismatches between the expected results and the actual results to a fault simulator; and

Receiving a second failing region from the fault simulator, the second failing region created in response to the mismatches and the logic model, and the second failing region corresponding to a subset of the first failing region.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2138
